

Facility Safety Record

Bishop Rock Climbing
1180 Sierra Vista Rd, Bishop, CA

Document ID: 73e9de56-d3e1-4cb2-8c72-914fc44e445d

Period: Jun 7, 2026 through Sep 5, 2026 (America/Los_Angeles)

Scope: Entire facility

Records: 218 ledger entries fall within this scope and period; all 218 appear in this document.

Generated: 2026-09-05T13:30:10.179Z (UTC) · Sep 5, 2026, 6:30 AM (America/Los_Angeles)

Generated by: Telure, authenticated session

Produced by: Telure Safety Record System v1.0.0

Verification: The SHA-256 digest of this exact file is registered under the Document ID above at generation time. Any recipient can independently confirm at telu.re/verify that this document was produced by the system and has not been modified since.

DEMONSTRATION DOCUMENT: NOT A RECORD OF ANY REAL FACILITY

This was produced from a demonstration copy of Telure that anyone may create and edit. The facility name, the people and every record in it are illustrative, whatever they say. The document itself is genuine and registered: confirm at telu.re/verify, which will report it as a demonstration.

RECORD INTEGRITY VERIFIED

All 219 ledger entries for this facility form an unbroken SHA-256 hash chain, re-verified at generation time. Immutability is enforced at the database layer: triggers reject UPDATE and DELETE on record tables for every role, the service role included. No administrative function (including vendor-side support access, which is structurally read-only) can alter or delete a submitted record. Every correction appears as a visible amendment referencing its original.

CWA-INFORMED ALIGNMENT TRACKER: ON since Jun 22, 2026

Alignment: 57% (4 of 7 clauses, 1 marked not applicable). Every clause marked not applicable is listed with its reason in the facility profile section.

Tracker history:

Jun 22, 2026: tracker turned on

This tracker is Telure's own clause list, informed by the organization's published document. It does not replace

reading that document yourself and verifying your facility against it, and marking a clause here is a note on your own record, not a statement by that organization. Where equipment is involved, the manufacturer's documentation governs.

What this document is not

- Not a safety determination, a certification, or evidence of compliance with any standard.
- The manufacturer's documentation governs wherever it conflicts with anything recorded here.
- Entries reflect what the named individual reported observing at the stated time.
- The absence of a recorded defect is not evidence that no defect existed.
- Telure records what qualified staff observed and when. It does not perform inspections, certify equipment, or determine that anything is safe.

DEMONSTRATION

Summary

Adherence: 29 of 38 scheduled requirements due in this period completed on the due day or earlier (76%).

Open overdue at report date: 2

Open corrective items: 1, oldest open 0 days

Amendments in period: 1

Duration outliers: 1

Detail: Every number above is broken out, with its definition and denominator, in the sections that follow. The full entry-level record is the final section.

Inspection runs: 127

Scheduled task completions: 36

Scheduled tasks recorded as blocked: 1

Interval completions (functional tests, recertifications, structural): 6

Maintenance resolutions: 1

Incidents: 1

Equipment lifecycle events: 7

Notes: 2

Training completions recorded: 24

Training checklist items certified by a colleague: 6

Telure Standard clauses marked not applicable or restored: 1

Food and beverage products logged or changed: 5

Records transcribed from uploaded documents: 1

Facility profile, as of the report date

Facility: Bishop Rock Climbing

Address: 1180 Sierra Vista Rd, Bishop, CA

Facility type: Climbing gym (Roped and bouldering)

Operating hours: 07:00-22:00, America/Los_Angeles

Active modules: recurring tasks, daily inspection, auto belays, recall matching, incident reports, training, food beverage

Record retention policy: 7 years

On system since: Jun 7, 2026

Closure days during the period: 2026-07-22: Quarterly maintenance day (full facility) · 2026-08-21 to 2026-08-23: Routesetting reset: full cave strip and re-set, closed to members · 2026-08-24: Staff training day: belay check-offs and rescue drill

Exports of this record: 1 document generated and registered to date, this one included.

Telure Standard alignment, as of the report date

Alignment: Alignment: 57% (4 of 7 clauses, 1 marked not applicable). 4 of 7 clauses applicable at this facility have at least one live task, checklist item or training module matched to them. 1 clause is marked not applicable, which removes it from both the numerator and the denominator. Each one is listed below with the reason recorded for it.

Denominator: The 8 clauses in the Telure Standard list for this facility type, Climbing gym (Roped and bouldering), less the 1 marked not applicable. The list is Telure's own, informed by the Climbing Wall Association's Industry Practices, A Sourcebook for the Operation of Manufactured Climbing Walls, and that is what makes a percentage against it honest: Telure wrote the list and can enumerate it completely. It is never a percentage of ASTM, CWA, NFPA, ANSI or any other body's document, and no part of it is arithmetic performed on an outside standard.

What this measures: Whether a check exists for each clause in that list. The facility's own tasks, checklist items and training modules count toward it once someone matches them to the clause they cover, which is how work the facility wrote itself checks a clause off. This is a statement about the program, not about performance: it says nothing about whether any check was carried out, or carried out on time. On-time adherence is a separate figure with its own denominator, reported under Schedule and adherence. The two measure different things and neither substitutes for the other.

What it does not count: Any check that has not been matched to a clause, whatever its merit. Matching is a deliberate act by the facility; nothing is matched automatically, so a facility can be doing the work a clause describes and still show it as not checked off.

Fine print: This tracker is Telure's own clause list, informed by the organization's published document. It does not replace reading that document yourself and verifying your facility against it, and marking a clause here is a note on your own record, not a statement by that organization. Where equipment is involved, the manufacturer's documentation governs.

Marked not applicable at this facility, and therefore removed from both sides of the figure

- Structural & wall-system inspection: Scheduled with a qualified inspector for the fall shutdown week; documented here until completed.

Applicable clauses with no work matched to them

- Anchor & fixed hardware inspection
- Emergency action plan review
- Staff training & belay certification review

Individual clauses name published standards by way of reference, in the form "addresses ASTM F2970". Naming a document is a reference to it and nothing further; no figure in this section is computed against one.

The Telure Standard is Telure's own curated program. Telure is not affiliated with, endorsed by, or licensed by any standards body or association named here, and adopting the Telure Standard does not make a facility compliant with, approved under, or certified to any standard. Where equipment is involved, the manufacturer's documentation governs inspection types and intervals.

Not captured by this system: legal entity name and DBA; itemized program list. Closure days are declared by facility managers and cross-referenced in the gap report; a closure declared after the fact is marked as such.

Personnel

5 accounts active at some point in the period. Deactivation revokes access but never removes or anonymizes historical attribution; departed staff remain named on their entries.

Lynn Hill (General Manager · PIN-only account)

Account created Jun 7, 2026

Alex Honnold (Head Routesetter · PIN-only account)

Account created Jun 7, 2026

Janja Garnbret (Coach · PIN-only account)

Account created Jun 7, 2026

Adam Ondra (Front Desk · PIN-only account)

Account created Jun 7, 2026

Tommy Caldwell (Maintenance Tech · PIN-only account)

Account created Jun 7, 2026

Attribution strength for this period: 0 completions captured under the person's own signed-in session; 924 authorized by personal PIN at a shared station. Both name the individual; the method is recorded per completion.

Not captured by this system: verification of outside credentials with the body that issued them (the record states what the facility recorded and, where a scan was attached, what it was shown, not that a card is valid); credential state for people who were never given an account; PIN issuance and revocation history.

Training and certifications, as of the report date

Required pairs: 25 person-and-module pairs required: 22 current, 1 lapsing within 30 days, 1 lapsed, 1 never recorded.

What a completion states: A module with a checklist is complete when every item on it has been certified by someone other than the person being trained, and the clock runs from the latest of those certifications. A module without a checklist is complete when a manager recorded it, from the date they stated.

New hire safety orientation (repeats does not expire, 3 checklist items, required for everyone)

Emergency action plan walkthrough (repeats every 12 months, 3 checklist items, required for everyone)

Belay check sign-off (repeats every 24 months, 3 checklist items, required for everyone)

Auto belay daily inspection training (repeats every 12 months, 2 checklist items, required for everyone)

CPR and first aid certification (external provider) (repeats every 24 months, 2 checklist items, required for everyone)

Adam Ondra (Front Desk)

New hire safety orientation: 0/3 certified, current, no expiry, trained by Lynn Hill

Emergency action plan walkthrough: 0/3 certified, current until Aug 1, 2027, trained by Lynn Hill

Belay check sign-off: 0/3 certified, **nothing recorded**

Auto belay daily inspection training: 0/2 certified, current until Aug 12, 2027, trained by Lynn Hill

CPR and first aid certification (external provider): 0/2 certified, current until Aug 11, 2028, trained by Outside training provider

Alex Honnold (Head Routesetter)

New hire safety orientation: 3/3 certified, current, no expiry, trained by Lynn Hill

Emergency action plan walkthrough: 0/3 certified, current until Aug 1, 2027, trained by Lynn Hill

Belay check sign-off: 0/3 certified, **lapses Sep 25, 2026, trained by Outside training provider**

Auto belay daily inspection training: 0/2 certified, current until Aug 12, 2027, trained by Lynn Hill

CPR and first aid certification (external provider): 0/2 certified, current until Aug 11, 2028, trained by Outside training provider

Janja Garnbret (Coach)

New hire safety orientation: 2/3 certified, current, no expiry, trained by Lynn Hill

Emergency action plan walkthrough: 0/3 certified, current until Aug 1, 2027, trained by Lynn Hill

Belay check sign-off: 0/3 certified, **lapsed Aug 21, 2026, trained by Outside training provider**

Auto belay daily inspection training: 0/2 certified, current until Aug 12, 2027, trained by Lynn Hill

CPR and first aid certification (external provider): 0/2 certified, current until Aug 11, 2028, trained by Outside training provider

Lynn Hill (General Manager)

New hire safety orientation: 0/3 certified, current, no expiry, trained by Lynn Hill

Emergency action plan walkthrough: 1/3 certified, current until Aug 1, 2027, trained by Lynn Hill

Belay check sign-off: 0/3 certified, current until Jul 12, 2028, trained by Outside training provider

Auto belay daily inspection training: 0/2 certified, current until Aug 12, 2027, trained by Lynn Hill

CPR and first aid certification (external provider): 0/2 certified, current until Aug 11, 2028, trained by Outside training provider

Tommy Caldwell (Maintenance Tech)

New hire safety orientation: 0/3 certified, current, no expiry, trained by Lynn Hill

Emergency action plan walkthrough: 0/3 certified, current until Aug 1, 2027, trained by Lynn Hill

Belay check sign-off: 0/3 certified, current until Aug 8, 2028, trained by Outside training provider

Auto belay daily inspection training: 0/2 certified, current until Aug 12, 2027, trained by Lynn Hill

CPR and first aid certification (external provider): 0/2 certified, current until Aug 11, 2028, trained by Outside training provider

Telure records what the facility recorded. A certification names the colleague who made it and the moment they did; an outside card is recorded as the facility read it, and is not checked with the body that issued it. Records are never edited: a correction is a separate amendment, and both are in the ledger.

Equipment registry, as of the report date

Registry: 5 serialized assets: 5 in service, 0 out of service, 0 retired.

Added during the period: AB-3 (Rope Walls, lane 3), AB-4 (Rope Walls, lane 4), Anchor hardware set (Rope Walls), Cave landing mat M-1, Top-rope line TR-2

AB-3 (Rope Walls, lane 3) (Auto-belay) · Meridian Descent Systems · S/N MDS-1847 · Rope Walls

Status: in service · in service since Jul 12, 2025

Schedule: Monthly function test (manufacturer procedure), every 30 days, last recorded Aug 19, 2026

Schedule: Annual manufacturer recertification, every 365 days, last recorded Jul 24, 2026

AB-4 (Rope Walls, lane 4) (Auto-belay) · Meridian Descent Systems · S/N MDS-1848 · Rope Walls

Status: in service · in service since Jul 12, 2025

Schedule: Monthly function test (manufacturer procedure), every 30 days, last recorded Aug 19, 2026

Anchor hardware set (Rope Walls) (Carabiner) · no serial recorded · Rope Walls

Status: in service · in service since Nov 9, 2025 · manufacturer retire-by Oct 20, 2026

Schedule: Condition & function check (manufacturer schedule), every 90 days, last recorded Jul 26, 2026

Cave landing mat M-1 (Crash pad) · no serial recorded · The Cave (Bouldering)

Status: in service · in service since Jun 27, 2024 · manufacturer retire-by Apr 27, 2028

Schedule: Condition & function check (manufacturer schedule), every 90 days, last recorded Jul 13, 2026

Top-rope line TR-2 (Rope) · Corvid Ropes · no serial recorded · Rope Walls

Status: in service · in service since Jan 8, 2026 · manufacturer retire-by Jan 8, 2028

Schedule: Quarterly sheath & core inspection, every 90 days, last recorded Aug 19, 2026

Interval labels carry their cited source where one was configured (for example a manufacturer manual section). An interval whose label names no source has no recorded citation. Equipment lifecycle changes (out of service, return, retirement) are ledger entries and appear in the entry record.

Not captured by this system: purchase date, date of manufacture, cycle or hour limits, and a structured status-change table (status history is recoverable from equipment-event entries in the ledger).

Food and beverage registry, as of the report date

Registry: 4 products logged: 3 stocked, 1 no longer stocked.

Logged during the period: Chameleon Cold Brew Coffee, Quaker Chewy Bars Peanut Butter Chocolate Chip, Skratch Labs Electrolyte Drink Mix, Second Nature Trail Mix, salted

Comparable by code: 2 of 3 stocked products carry a UPC or lot code. The rest can only be compared to a recall notice by brand and product words.

Open recall matches: none

Chameleon Cold Brew Coffee (beverage) · no UPC recorded · lot CB-2261

Status: stocked · logged Sep 5, 2026

Quaker Chewy Bars Peanut Butter Chocolate Chip (snack) · UPC 030000123456

Status: stocked · logged Sep 5, 2026

Skratch Labs Electrolyte Drink Mix (supplement) · no UPC recorded

Status: stocked · logged Sep 5, 2026

Second Nature Trail Mix, salted (snack) · no UPC recorded

Status: no longer stocked · logged Sep 5, 2026

Food recall monitoring compares openFDA food enforcement data against the products logged here. It is not an authoritative or complete source of recall information; USDA/FSIS meat, poultry and egg-product recalls are not included. The facility remains responsible for checking fda.gov and supplier notices directly.

Schedule and adherence

Adherence: 29 of 38 scheduled requirements that fell due in this period were completed on the due day or earlier (76%). The denominator excludes requirements not yet due and counts blocked items as not done.

Completed late: 7

Not completed: 2

Blocked (recorded as unable to complete): 1

Completed late

- Rental equipment inspection: due Jun 25, 2026, completed Jun 26, 2026 (1 day late)
- Staff training & belay certification review: due Jun 25, 2026, completed Jun 26, 2026 (1 day late)
- Rope log review: due Jul 13, 2026, completed Jul 14, 2026 (1 day late)
- Flooring & impact-attenuation inspection: due Jul 20, 2026, completed Jul 21, 2026 (1 day late)
- Rental equipment inspection: due Aug 6, 2026, completed Aug 7, 2026 (1 day late)
- Rope log review: due Aug 24, 2026, completed Aug 25, 2026 (1 day late)
- Flooring & impact-attenuation inspection: due Aug 24, 2026, completed Aug 25, 2026 (1 day late)

Not completed

- Flooring & impact-attenuation inspection: due Aug 31, 2026
- Rental equipment inspection: due Sep 3, 2026

Blocked

- Anchor & fixed hardware inspection: due Sep 2, 2026 (Lift out for repair: top anchors unreachable until it returns; rescheduled for Thursday with the rental house confirmed.)

Open and overdue at report date (including items due before this period)

- Flooring & impact-attenuation inspection: due Aug 31, 2026, 5 days overdue
- Rental equipment inspection: due Sep 3, 2026, 2 days overdue

Not captured by this system: a change log for schedule configuration. Edits to a task's cadence are not themselves recorded, so a cadence change during the period is not visible here; past due occurrences are preserved as generated and are not rewritten by later edits. Telure Standard pauses and archivals are the exception: each requires a documented reason, which appears in the Telure Standard history on the cover.

Failures and corrective actions

Flagged in this period: 2 inspection items flagged; 2 corrective work items opened.

Closed in this period: 1, median 1.1 days to close, slowest 1.1 days.

Open at report date: 1

ATTENTION: Mats seated: no gaps at seams or wall junctions: recurring at the same point

OPEN 0 days (opened Sep 4, 2026)

As flagged: Seam gap opening at the cave lip on mat M-1; the velcro flap no longer holds under traffic. Second occurrence at the same location; monitoring daily and replacement scheduled.

ATTENTION: M-1 seam flap re-laminated

Opened Aug 31, 2026 · resolved Sep 1, 2026 (1.1 days)

As flagged: Seam gap opening at the cave lip on mat M-1; the velcro flap no longer holds under traffic.

The flag that opened each item, the photos attached to it, and the resolution entry that closed it are all in the entry record, hash-chained. Resolution details appear on the resolving entry.

Not captured by this system: a per-item assignee and due date on corrective work, third-party vendor attestations, and independent verification of a fix by a second person.

Amendments

Amendment rate: 1 amendment recorded in this period against 218 entries (0.5 per 100 entries). An amendment never replaces its original: both remain in the ledger, and the original renders in full with the amendment beneath it in the entry record.

By person: Lynn Hill: 1

#181 amends #178 · Lynn Hill · Aug 20, 2026, 8:05 AM · 22h 35m after the original

Reason: Serial transcribed incorrectly at completion.

Not captured by this system: field-level before/after diffs. An amendment is a stated reason and correction in the amender's words; the original remains the authoritative record of what was first submitted.

DEMONSTRATION

Gaps and exceptions (reported explicitly)

Each category states its definition and threshold, then its findings. A report that shows its own gaps can be tested; one that hides them cannot.

Missing opening walks

Every day in the period an opening walk was scheduled and no run was recorded, cross-referenced against the closure days declared in the facility profile so a genuine gap is distinguishable from a closed day. A walk is only counted against the days its own schedule made it due, so a weekly walk is not a gap on the other six days. Declared closure days without a check, not counted as gaps: Jul 22, 2026 (Quarterly maintenance day (full facility)); Aug 21, 2026 (Routesetting reset: full cave strip and re-set, closed to members); Aug 22, 2026 (Routesetting reset: full cave strip and re-set, closed to members); Aug 23, 2026 (Routesetting reset: full cave strip and re-set, closed to members); Aug 24, 2026 (Staff training day: belay check-offs and rescue drill).

- No opening walk recorded on Jun 8, 2026.
- No opening walk recorded on Jun 9, 2026.
- No opening walk recorded on Jun 10, 2026.
- No opening walk recorded on Jun 11, 2026.
- No opening walk recorded on Jun 12, 2026.
- No opening walk recorded on Jun 13, 2026.
- No opening walk recorded on Jun 14, 2026.
- No opening walk recorded on Jun 15, 2026.
- No opening walk recorded on Jun 16, 2026.
- No opening walk recorded on Jun 17, 2026.
- No opening walk recorded on Jun 18, 2026.
- No opening walk recorded on Jun 19, 2026.
- No opening walk recorded on Jun 20, 2026.
- No opening walk recorded on Jun 21, 2026.
- No opening walk recorded on Jun 22, 2026.
- No opening walk recorded on Jun 27, 2026.
- No opening walk recorded on Jul 8, 2026.
- No opening walk recorded on Jul 19, 2026.
- No opening walk recorded on Jul 30, 2026.
- No opening walk recorded on Aug 10, 2026.
- No opening walk recorded on Sep 1, 2026.

Equipment obligations past due at generation time

Active equipment inspection intervals whose next due date is in the past as of the moment this document was generated. Task-level overdue items appear in Schedule and adherence.

No equipment interval is past due at generation time.

Duration outliers

Inspection runs completed in under 90 seconds, this facility's configured threshold. Speed alone proves nothing; the pattern is what a reader should weigh.

- Opening Check on Aug 30, 2026: 41s for 8 answered items.

Recording delay

Item completions recorded more than 4 hours after their captured performance time, typically offline capture synced late. Both timestamps are stored on every completion.

No completion in this period was recorded more than 4 hours after capture.

Coverage

Portions of the period the system was not in use at this facility, so that rates elsewhere in this document carry honest denominators.

- This facility was onboarded Jun 7, 2026, inside the selected period. Denominators before that date describe days the system could not have recorded.

System outages

Windows in which the recording system itself was unavailable.

- The system does not currently self-record outage windows, so none can be listed here. Offline capture continues during connectivity loss and syncs with both timestamps preserved.

Definitions and thresholds

On time: Completed on the due day (facility-local calendar day) or earlier. Days late are whole local days after the due day.

Not completed: Due before this document was generated, with no completion recorded and not marked blocked.

Duration outlier: An inspection run finished in under 90 seconds (this facility's configured threshold). Flagged at capture time; never blocks submission.

Recording delay: More than 4 hours between an item's captured performance time and its server record time.

Individual answering: Every inspection item is answered one at a time, at the moment of capture, by a named person. There is no bulk-pass mechanism in this system; per-item timestamps and attribution exist for every result.

Retention: 7 years, configured for this facility.

Areas: The Cave (Bouldering) · Rope Walls · Training Area · Front Desk & Rentals

Not captured by this system: checklist template version history and area rename history as reconstructable appendices. Each entry snapshots the checklist name and item labels as they were at capture time, so the entry-level record is faithful even where a template later changed.

#176 9:12 AM Monthly function test (manufacturer procedure): AB-3 (Rope Walls, lane 3) (PASS)

Recorded by Lynn Hill · server time Aug 19, 2026, 9:12 AM · SHA-256 d9fdf4f926fcb9e6...

Performed by: Lynn Hill

Result: PASS

Note: AB-3 monthly function test per the manufacturer's procedure: retraction smooth through full extension, braking engaged at test weight, webbing clean at the wear window.

Serial: MDS-1847

#177 9:15 AM Quarterly sheath & core inspection: Top-rope line TR-2 (PASS)

Recorded by Lynn Hill · server time Aug 19, 2026, 9:15 AM · SHA-256 e6d4417b6cfbee70...

Performed by: Lynn Hill

Result: PASS

Note: Within the manufacturer's schedule. No findings.

#178 9:30 AM Monthly function test (manufacturer procedure): AB-4 (Rope Walls, lane 4) (PASS)

Recorded by Lynn Hill · server time Aug 19, 2026, 9:30 AM · SHA-256 018c9a9bd425260a...

Performed by: Lynn Hill

Result: PASS

Note: AB-4 monthly function test: retraction and braking nominal. Gate spring on the connector replaced from spares; noted on the unit's card.

Serial: MDS-1848

AMENDED: entry #181, Aug 20, 2026, 8:05 AM by Lynn Hill

Reason: Serial transcribed incorrectly at completion.

Correction: The unit tested was MDS-1848 (AB-4), not MDS-1846; the test sheet and lane assignment confirm it.

Result unchanged.

#191 1:45 PM Incident: Member froze on the lane 4 auto-belay; talked down, no injury

Recorded by Alex Honnold · server time Aug 27, 2026, 1:45 PM · SHA-256 78db20105196d035...

Occurred: Aug 27, 2026, 1:45 PM

Location: Rope Walls

Description: An adult member hesitated at the top of lane 4 and grabbed the anchor sling instead of weighting the device. Floor staff talked them into weighting the line and they descended under control. No injury; declined further assistance.

People involved:

Marisol Vega (Member) · marisol.vega@example.com · No injury. Declined first aid and finished the session after an orientation refresher at the desk.

Janja Garnbret (Staff) · Coach on the floor · Reached lane 4 first and talked the member down.

Staff response: Coach reached the lane within seconds, talked the member through weighting the device, confirmed a controlled descent, and ran an orientation refresher at the desk before their next climb.

Witness statements (2):

Priya Raman · priya.raman@example.com · signed Aug 27, 2026, 1:49 PM

I was climbing lane 5 and heard someone say they were stuck. She was holding the sling at the top and would not sit back. A coach came over within a few seconds and talked her through leaning back, and she came down slowly and stood up fine. Nobody else was on that lane.

Signature SHA-256 20a008cd8bcb14419bc0843455e9616e466f76f1b2ce6f27436ef2fc171029be

Dmitri Alcott · 555 0140 · signed Aug 27, 2026, 1:52 PM

I was belaying my partner two lanes over. The member at the top looked frozen rather than falling. Staff got there fast and kept talking to her the whole way down. She walked off on her own and did not seem hurt.

Signature SHA-256 ebc8593ba16d47f27908487ede050cc8ecbd310481765c4f5997d3316e80e8a6

Other witnesses (noted by staff): Front desk staff; two members in the adjacent lane

Attached history: 30 inspection record(s) covering Aug 14, 2026, 6:40 AM through Aug 27, 2026, 6:39 AM, frozen at incident creation (entry ids and hashes recorded in the ledger).
